

## Green Floor Products

Reducing Costs & Sustaining the Environment

## About One Planet Corp.

One Planet is a provider of green products and services that focus on helping companies reduce their costs and sustain the environment.

We believe that green products can be more cost effective than traditional products. Companies simply do not have to sacrifice profitability to be environmentally responsible. Part of the One Planet product line includes a series of finished flooring comprised of eco-friendly materials, the key product being bamboo utilized in innovative ways to insure maximum utilization of the raw material while still providing the style that today's consumers demand.

At One Planet we are continuously searching the globe in order to bring the best green solutions to local markets.

### Bamboo Floor Kitchen

Bamboo floor is "green", easy to clean, and adds plenty to the value of your kitchen and other areas of your home.

### Technology Guide

The terms, units, and guidelines that associated with the bamboo flooring will help you to understand when you choose the bamboo flooring.

## Why One Planet Bamboo Floor?

- Environmentally sustainable - bamboo flooring is an attractive alternative to wood floors, and is a product derived from the forests of a fully sustainable, environmentally friendly and rapidly growing renewable resource.
- Coupled with its price advantage, bamboo products are creating significant interest for their aesthetic and other performance qualities over existing hard wood alternatives. And bamboo provides a highly competitive commercial product.
- Very stable under humid and dry conditions
- Bamboo is colour fast as it is not surface stained but consistent through to the core.
- High UV resistance, blocking the sun's harmful rays and protecting the floor pattern from fading over time.
- Easy cleaning, since bamboo flooring doesn't trap dirt. Most spills can be cleaned up with a mop or sponge.
- Bamboo timber flooring is retardant against termites, fire, sunlight, chemical, stains, scuffing and indentation.
- Easy installation.

## Quality

Complies with E1 standards. Manufactured to ISO 9001:2000 Quality standards. Which is part of an international Organisation for Standardisation that regulates product quality and manufacturing.

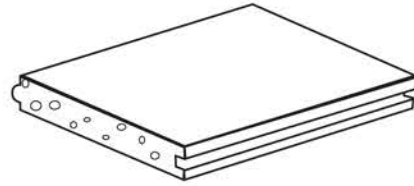

ITEM	UNIT	GUIDE LINE
Moisture	%	≤ 4-8%
Density	G/cm <sup>3</sup>	0.6-0.8
Hardness	Mpa	≥ 60
Anti-Bending Intensity	Mpa	≥ 90
Flexibility Intensity	Mpa	≥ 80
Impulsion Intensity	Aj/m <sup>2</sup>	≥ 95
Wet Distensibility	%	≤ 0.5
Paint-Firm Hardness	H	3-4
Tolerance	mm	≤ 0.10
Wear Away Round	r	100r
Wear Away Value	g/100r	≤ 0.08

## Bamboo Floor Series

### Serenity Series - (Solid Tongue & Groove Bamboo)

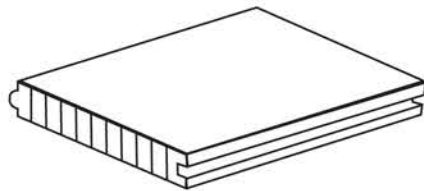

The Serenity Series of solid bamboo flooring utilizes the strands of bamboo in a unique high pressurized manner that provides a solid plank of flooring that is nearly twice as dense as regular bamboo flooring. The high density of this flooring makes it ideal for high traffic or high wear areas. The unique pattern of the fibers of bamboo along with the rich high wear stains and finishes provide a calming and peaceful look to any room. The strand woven bamboo provided in the One Planet Serenity Series utilizes the entire bamboo cane therefore not creating any waste or unused portions that may be discarded.

**Strand Woven**

### Vitality Series - (Solid Tongue & Groove Bamboo)

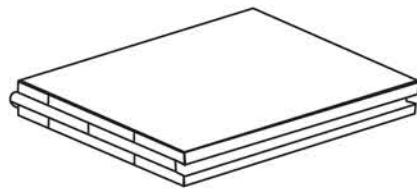

The Vitality Series of solid bamboo flooring provides a strong contemporary look with the bamboo set on its edge. The canes are cut into narrow strips and laminated together to provide a unique closely packed look that is somewhat different than other types of typical hardwood flooring. This positioning of the bamboo on its edge along with the manufacturing process provides for a very durable and stable product suitable for any home.

**Vertical**

### Harmony Series - (Solid Tongue & Groove Bamboo)

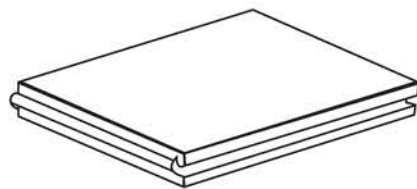

The Harmony Series of solid bamboo flooring affords the most natural or traditional look of bamboo exposing the knuckles along with the wider cut of the bamboo cane itself. This classic look of bamboo is combined in three layers to provide a very stable and solid base. The traditional appearance of the bamboo can be united with a variety of stains and finishes to provide affinity to any room design.

**Horizontal**

### Serenity Series (Click) - (Engineered Click Bamboo)

The Serenity Series (Click) of engineered bamboo flooring takes advantage of the latest technology in strand woven bamboo flooring and combines it with a simple but effective connection process in order to lock the pieces together. This product allows you to very quickly achieve the desired look of bamboo flooring without the hassle of nailing or worrying about the subfloor. This unique feature combined with the high durability layer of strand woven bamboo will provide a long lasting floor finish that has one of the lowest impact on the environment.
